Music Learning

Abstract
Music rhythm brings peace to people’s soul and help studying, but the ways of music learning always bored, how to increase learner’s interest is very important. Many researches showed that People always interest in game studying, and Online Rhythm Game also advertise that playing game can increase people rhythm perception. Therefore, how Online Rhythm Game can effect user’s music learning and rhythm perception are the purposes of this study.
This study separated students into two groups, twenty-six students of experimental group and twenty-nine students of control group. Also, this study used In-Depth Interview to ask students their opinions about playing online rhythm game.
The Results found significant differences between the experimental group and the control group. Also, the more participated in playing the rhythm game, the higher the rhythm score showed. Playing the rhythm game improved users music learning and rhythm perception were proven in this study. The results also provided suggestions to game designers.
