Just-In-Time Purchasing
Integrated Inventory Models
Limited in Storage Capacity
Number Storage Conveyances

Abstract
Because of the management system that just in time was bloomed, the important problems must be research with buyer and vendor which were the policy of small batch shipped, limited in Storage Capacity of transportations and the number of transportations be used.In order to move up competitiveness and profit of the enterprise. It is a key point in the future that how to make the policy of inventory and shipment.
This research conducted on JIT purchasing which was limited in storage capacity and number storage conveyances was used for single buyer and single vendor of a product system. It is the goal that minimum total joint cost. We develop the integrated inventory models for the vendor of most suitable production strategy, the buyer of most suitable procurement strategy, and the number of transportations was used. Numerical examples are included to illustrate.
