課程時數	3
實習時數	0
授課語言 1	英語
授課語言 2	
輔導考照 1	
輔導考照 2	
課程概述	<p>This course is to provide a comprehensive introduction of basic features in the monetary mechanism and banking system. The modern money system plays a pivotal role in shaping the proper general price level which can ease price inflation's pressure and even infuse growth momentum into the economy. The central bank, whose money policies bring great impacts on interest rates which can cause changes in asset prices, is the central agent of this field.</p> <p>This course will focus the intense intentions on the contents of various money policies as well as their possible influences on key variables of economy, including general price level, foreign exchange rate, enterprise productivity, economy growth. The details of this course can be categorized into several subgroups which contain the functions of money, the role of the central bank, money creation process and money supply, money demand theories, AD/AS model, etc.</p>
先修科目或預備能力
